

The following is the status of the Solon Historical Societies Update of Archives and Collections Project.

The Societies volunteers have been working for some time to organize our materials and properly secure these with the appropriate archival materials. Since starting this process we have had numerous work days and have completed nearly 300 hrs of work. Work has continued this summer in sorting materials for preservation. We have also secured a student History Intern that will also be assisting. Storage materials will be ordered for delivery in early September. We plan to continue our project throughout the fall and to use these best practices for years to come.
